

**Bubble Tube Area**

70" Bubble tube, x2 60" bubble tubes, acrylic mirrors, 40" square bubble tube bases.

**Solar 250 Projector**

Effect Wheels are highly recommended for essential Snoezelen work. They allow the individual to relax with the image without the need to predict or decipher the shapes or patterns of objects.

**Colour Wall Controller**

Washes the wall with a dramatic and striking effect. This is a wi-fi product and will interact with the talking cube and wirefree controller.

**Mirror Ball & Color Wheel Spotlight Combo**

Combined with the spot light it provides sparkles of light which rotate constantly. Ideal for tracking.

**Stereo**

**Aroma Diffuser**

Quiet, safe, and easy to use. This battery-operated, fan-driven compact device allows efficient dissipation of essential oils through the natural method of fan diffusion.

**Rocker/Glider**

Hardwood construction, high density foam, and spring reinforced seat provide years of reliable use. Also features side panels with deep pockets for convenient storage. Seat cover and side panels can be removed for washing. Smooth, quiet glide, large seating surface, and tip-resistant base combine comfort with safety.

**Abbotsford Chair**

This chair features one large full-range vibroacoustic speaker. Connects easily to any stereo system or VCR/TV with 20 to 200W of power. Soft, comfortable, leather-like vinyl upholstery with protective coating.

**Wireless Controller**

Wireless switch which controls all WiFi equipment within the room. Robust, interactive, tactile and educational. Great for cause and effect skills.

**Mega Pod**

This interactive panel combines touch and sound technology to encourage interaction and focus. Users can play music, move shapes, create kaleidoscope effects, trace shapes or play memory games. The Mega Pod can be used as a stand alone panel in your classroom, hallway, or Snoezelen multi-sensory environment. All applications are fully interactive either by touching the screen or using the built-in microphone.

**Blackout Curtains**

**LED Shadow**

Voice activated LED UV black light.

**Vibromusic Recliner**

Features effortless positioning from upright to full zero-gravity reclining, two 12" full-range main vibration speakers located in the center of the upper-body and lower-leg sections, and two 4" full-range hi-fi stereo speakers with volume control in the headrest.

**Sound Responsive Light Panel**

Making and vocalizing sounds are encouraged by a delightful colorful display. The louder the sound, the higher the ladder illuminates! Panel comes with microphone included.

**Projection**

**Adjustable Table**

**Fiber Optic Light Spray & Enclosure**

Extremely effective method of providing visual and tactile stimulation, especially for those with limited verbal ability.

**Laser Sky Projector**

Transform your ceiling into an illuminating, twinkling, dazzling, starry night sky.
